QUALITY ASSURANCE FACILITY
60 RIVERBANK ROAD
OTAKI NEW ZEALAND

SAMPLE: **1m x 1m TEST SAMPLE ON CONCRETE SLAB**
REBOUND 85 SH

CRITICAL FALL HEIGHT: **0.5 metres**

We, Consulting Coordination Pty Ltd of 4824 The Parkway, Sanctuary Cove Queensland 4212 Australia hereby certify that we have assessed the Matta Products Limited playground surfacing as specified above for compliance with current Standards. Testing with a Triax 2000 Portable Surface Impact Test Rig S/N 30-7816(786) was conducted on the Matta Products Limited playground surface in accordance with the procedure set down in BSEN 1177:2008 Impact Attenuating Playground Surfacing – Determination of Critical Fall Height. Based on our assessment we are satisfied that the Matta Products Limited playground surfacing has achieved the impact attenuation requirements of BSEN 1177:2008 for free heights of fall up to the stated critical fall height. This certificate is valid for three (3) years from the date of issue providing there is no change in the assembly or content of the materials or manufacturing process of the products tested.
